Use your log-in credentials provided by PSI to gain access. You may find it helpful to bookmark this page.

Select Reports

Under reports, you will have access to new and older reports.
#1 for a report of individual student performance on the exam. This report is for students testing in 2018 to present.
#2 is for school performance reports. This provides you with a summary of group performance, broken down by first time test takers, repeat test takers, and all test takers. The performance report provides average scores, percent average scores, and a comparison to national averages. This report is also for students testing in 2018 to present.
If selecting report #1, NBSTSA Content Results by School Beginning 2-1-2018, complete the drop down boxes in the order as numbered, then click view report (#6).

You may then click on the save icon to export the report in a format of your choice.
Select #2 to view NBSTSA School Performance Reports – Beginning 2/1/2018

To view performance results select exam (#1), and then enter beginning and ending dates for the year. For 2018, select no later than 12/17/2018 as the end date. Click view report.

This screenshot has been highlight to show the different data available. Yellow (All) includes data for both first time and repeat test takers. Green (First Time) is for first time test taker and provides the data for students that you test by WBT on-campus. Red (Repeat) provides data for students that have re-taken the exam after graduation. Blue (National All) includes data for all test takers that took the exam during the included time period.
The bottom of the First Time column provides data for the average performance of all WBT students that competed in the time period selected for the report. The %Total is the average point divided by the points possible. This percent for the average Total raw score can be compared from year to year regardless of the total number of questions on the exam. For 2018 exams, this represents the average score divided by 175. For 2019 exams, this represents the average score divided by 150.

You can export a copy of your results in a file of your choice. Export as an Excel spreadsheet and you can easily copy and paste data that you want to compare into another spreadsheet.
### Example of an exported spreadsheet.
